OUR MISSION

FIRST PHIL SKILLS & EQUIPMENT TESTING CORPORATION is dedicated to provide its valued clients the services of a Third-Party Inspector for various construction and transportation machineries.

With the ultimate goal of coming up with the highest standards on Equipment

Safety Performance audit, FPSET Corp. is committed to the field of manpower training and development. The company's involvement in these two fields of endeavors aims to enhance dynamism and bring out the best from our client's work force as dictated by the present business trends. Finally, to persistently keep up to date with the latest industry practices and technological developments resulting in better business competitiveness of our clients both in the local and international Market.

ROLAND C. MANCILLA
FOUNDING PRESIDENT &
CEO 1999-2013

CRESCENCIO B. MARAMAG JR.

PRESIDENT 2013-2023

With more than 40 years of experience in the construction industry, Engr. Maramag has used his expertise in equipment in the field of safety. In the 90's he became part of the team of experts that helped formulate the Training Regulations and Competencies for Construction Heavy Equipment operators. He has attended numerous seminars relating to management, leadership and equipment safety both here and abroad. Personally over-seeing the training of equipment inspectors of the company, he, along with the late president has ensured the quality of service that FIRST PHIL SKILLS & EQUIPMENT TESTING CORP. provides.

CORPORATE SAFETY POLICY

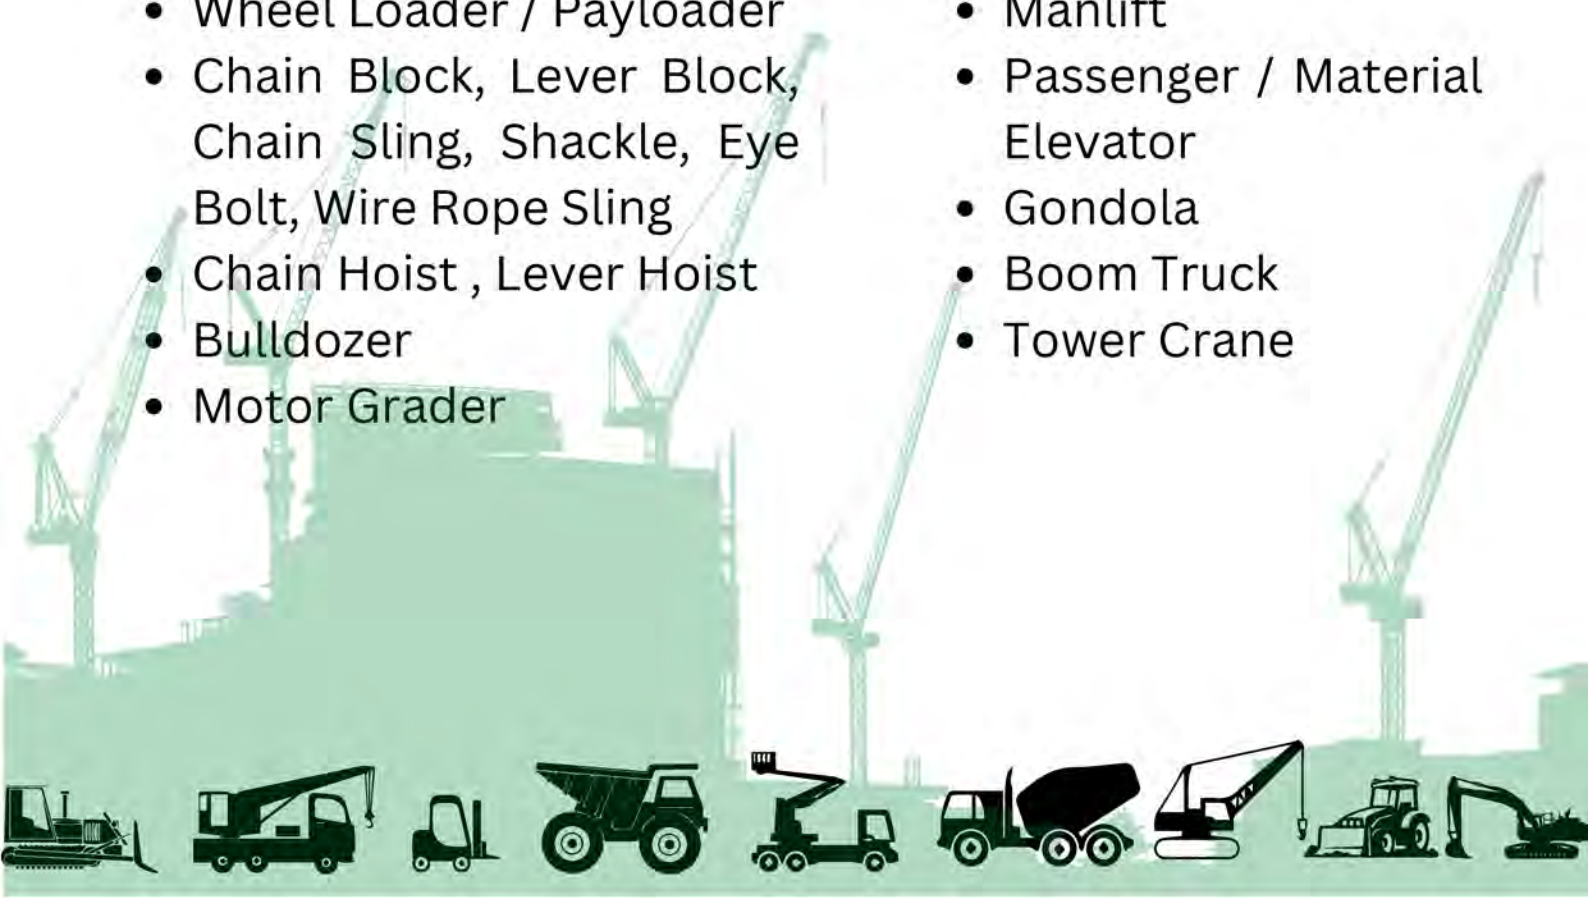

1. The company is committed to the health and safety of each worker. Our goal is zero fatalities and zero injuries at all worksites.
2. The company is responsible for its own injuries and illness prevention program.
3. All field employees had undergone the necessary safety training corresponding to their specific job description.
4. All field employees are provided with personal protective equipment for their individual use.
5. The employees use the appropriate tools & instruments required in the execution of their trade.
6. All work areas, passageways and roadways shall be kept free of debris, hazardous materials and waste as necessary.
7. All dangerous conditions created in the course of our work will be properly barricaded and marked appropriately to serve as warning to others.
8. No pets, alcohol, drugs, or minors will be allowed at the worksite.
9. We will conduct toolbox meetings with our client's representatives prior to any equipment inspection and testing activity.
10. Any injuries incurred by employees on job sites will be reported to our client within one hour of our becoming aware it had occurred.
11. Any unsafe condition or acts by other persons which will endanger our workers will be reported immediately to the client for the necessary action.
12. All employees are judiciously briefed on the company's injury and illness prevention program.
13. The company will make sure that the accident insurance policy of all personnel is always in effect.
14. The company's code of safety practice is subject to periodic review and upgraded as the need arises.
15. The company encourages all employees to practice safety as their way of life.
